

KBar Product Guide

Installing KBar

- Download and install the free [ZXP Installer \(http://aescrpts.com/learn/zxp-installer/\)](http://aescrpts.com/learn/zxp-installer/) from aescrpts.com
- On Mac OS X, drag kbar-3.0.0.zxp onto the ZXP installer.
- On Windows, go to File > Open, then browse for the kbar-3.0.0.zxp file.
- Restart After Effects.

Starting KBar

- Go to the Window > Extensions menu, then click KBar.
- To switch toolbars, right-click the toolbar or the panel to pick the toolbar.

Configuring KBar

- From the panel menu (or right-click in the middle) click "KBar Settings".

Buttons Tab

- To **reorder buttons**, just **drag and drop** them around.
- To **assign modifier buttons**, expand an existing button and add it at the modifier slot OR drag an existing button into it.
- To **add a button/toolbar**, use the Add Button/Toolbar button.
- To **edit a button/toolbar**, just **click on it** or use the **pencil icon**.
- To **rename or delete**, a button or toolbar use the **pencil icon**.

Settings Tab

- Use the sliders to change the button sizes and spacing
- To import/export existing toolbars you can use the Import/Export Toolbars buttons.

Getting Support for KBar
