REQUIREMENTS

- **Alexander Blade's ScriptHookRDR2**

INSTALLATION INSTRUCTIONS

- Install Alexander Blade's ScriptHookRDR2
- Extract **Red Dead Radio.asi** in to your game's main folder
- Extract **Red Dead Radio folder** in to your game's main folder

HOW TO USE

Add .MP3 files in to either of the folders found in "Red Dead Radio" folder (currently there is a bug if music isn't found in a folder. The bug causes the radio wheel to flash. I suggest filling out all 3 radio folders)

If you want to rename your music folder make sure to also rename the path in **Red_Dead_Radio.ini** file found in "Red Dead Radio" folder.

When in-game, you can access Red Dead Radio by riding your horse, a wagon or driving a train.

Press "Q" + "R" to open the radio wheel and then click to select an option.

Media Player Mode:

If you want to listen to music while being on foot you can enable the "Media player mode". To do this, open "Red_Dead_Radio.ini" file and set the "media_player_mode" value to "true".

DESCRIPTION

Red Dead Radio is a mod which adds a functional radio wheel when the player is riding a horse, driving a wagon or is on a train. This will make it easy listening to music while riding across the map and kill boredom.

CREDITS

- This mod was requested from a Discord user named “archer”
