

RAGE: Transportation 1.0.0 by LtFlash

Installation

1. Make sure you've got a working installation of RAGE Plugin Hook. You can found it here: <http://ragepluginhook.net/>
2. Download the latest RAGENativeUI from here: <https://github.com/alexguirre/RAGENativeUI/releases> Place the *RAGENativeUI.dll* into the main directory of your GTA V installation.
3. Copy the content of "Installation" folder into the main directory of your GTA V.
4. Make sure the RAGE_Transportation.dll file and it's resource folder is placed in the "Plugins" folder.

How to use the mod?

1. Start GTA V using RAGE Plugin Hook.
2. Open RAGE Plugin Hook console by pressing F4 (by default) and run the following commang: *LoadPlugin RAGE_Transportation.dll*
3. Press F9 to display the main menu of the mod.
4. Activate the mod via the main menu.
5. Go to the red dot which marks the location of your freight company.
6. Get into one of many different trucks parked around company building.
7. Press F9 and navigate throught the menus to find a "Add freight" menu.
8. Choose one from many avaiable loads, set your loading point and destination. You can add multiple loads to some trucks/trailers.
9. Go to the loading point, park your trailer in the checkpoint and press LShift + U to load goods.
10. Haul the load to the destination point. You can check the load details in the menu.
11. Reverse your trailer/truck to the destination checkpoint and press LShift + U to unload your trailer/truck.
12. To get a trailer to deliver find a red marker of a business office and browse in offers. Not all businesses have one to transport.

For modders

The architecture of the mod allows anyone to add more loads, businesses which produce, accept stuff, create new repair shops etc. You can easily create those resources with SDK.

Default keys

Main menu: F9

Load/Unload: LShift + U

Show the Repair shop menu: LShift + R

The controls can be customized by editing the Keyboard.xml file using values listed here:
